HESI™ Dashboards

Peer-to-peer benchmarking used
for data informed planning

WHAT IS HESI™?

The Higher Education Scheduling Index (HESI™)is a peer database designed to help institutions effectively and efficiently manage the academic enterprise. It includes metrics from a cross section of 4-year public, 4-year private, and 2-year public higher education institutions to generate benchmarks to inform decision making. The HESI™ is leveraged by hundreds of institutions toimprove Degree Velocity™ and overall student success.

WHY USE HESI™ DASHBOARDS?

The goal of the HESI™ Dashboards is to generate benchmarks that can inform institutional scheduling practices and course offerings, in order to improve on-time graduation rates and better utilize existing space and other institutional resources. You can also see how your scheduling efforts are stacking up against your peers using comparison data with like institutions.

Add-on Monitor for daily registration insights. Ask us about special pricing!

KEY FEATURES

- Color coded and easy-to-use visuals to track progress with your data

- Filters to see what you want to see on each dashboard

- Comparisons with like institution types and Carnegie classifications
